

CONCORDIA

GOOD GOVERNANCE & DEMOCRACY

The Good Governance & Democracy Pipeline focuses on issues ranging from the rule of law and international justice to promoting democratic governance and ensuring the peaceful transfer of power. Concordia Members in this Working Group address the risk of environments conducive to corruption, impediments to accountable governments, and vested private sector interests in transparency. Collaborative Advisors and Partners are working together to foster cultures of accountability, to ensure free and fair elections, and to align anti-corruption efforts with stabilizing security measures around the world.
